VALUE COMPONENTS

Get more out of your 3DEXPERIENCE PLM system by enhancing overall productivity, performance, upgradeability, and end user adoption rate.

EXPERIENCE PACKAGED

By providing prebuilt enhancements to standard 3DEXPERIENCE functionality, Value Components lead to faster and higher returns on PLM investments.

Gaps will always exist between what users require and what the out-of-the-box 3DEXPERIENCE functionality provides.

To address these gaps, implementation teams need to evaluate the impact of changing the product on upgradeability, interoperability and implementation time.

TECHNIA Value Components target these situations by drastically improving usability, whilst at the same time reducing implementation time and the cost of upgrades!

User Experience

Choose from the long list of gap filling refinements to adapt the platform to your user needs.

Productivity

Free up time for users to spend on value adding activities.

Upgrades

Avoid customisation, configure your way to productive and happy users while retaining a low upgrade cost.

Performance

Leverage consolidated data retrieval and enjoy speedy UI's and a light server footprint.

Value Components

File Manager

Keep track of your files, and ensure redundant data is eliminated. Make your users faster and your quality high.

Graphic Reporting

Find your data quickly and view it in an immersive visual interface.

Grid Browser

Allows you aggregate, compare, and edit hundreds of complex data and relationships objects in a single view.

MCAD Optimizer

Enhances the usability of MCAD integrations based on the ENOVIA Integration Exchange Framework (IEF).

Helium

Enables secure access to ENOVIA data from your mobile device wherever you are.

Personal Browser

Unplug your computer and have your PLM data accessible wherever you go.

Structure Browser

Navigate, build and edit structures quickly and easily in ENOVIA.

XBOM Manager

Provides a user interface to reconfigure the engineering build (EBOM) into a series of Manufacturing builds (As built, As planned, As maintained, etc).

About TECHNIA

At TECHNIA, we pave the way for your innovation, creativity and profitability. We combine industry-leading Product Lifecycle Management tools with specialist knowledge, so you can enjoy the journey from product concept to implementation.

Our experience makes it possible to keep things simple, personal and accessible so that together we transform your vision into value.

With over 30 years' experience, more than 6000 Customers worldwide and world-class knowledge in PLM & Intelligent Engineering, we work together as true partner and extension of your team to create an exceptional PLM experience.

Our 680 people strong team work from 32 locations around the world, across vertical industries, delivering a premium service with a global infrastructure and a local presence. We adopt the latest technology and agile methodologies so, even as technology changes, our relationships last a lifetime.
